

Cedrex Microplate Labeler

The Microplate Labeler is developed for the printing and application of labels to microplates. It features a Zebra engine and prints a variety of widely used barcodes as well as human-readable text. The user has the comprehensive ZPL-language at his/her disposal which gives a very wide range of control of the contents of the label.

The Microplate Labeler is capable of applying labels to any of the four faces of the microplate. Furthermore it features a delidder/reidder for the use with lidded applications as an optional extra.

It accepts and delivers the microplate in both landscape and portrait format.

Access to the nest is possible from the top and three sides. When used with delidder/reidder the top access is blocked and access from the sides is restricted to a 30 mm window height.

Specifications

Interface:	Serial port
Label size:	6 x 50 mm
Printing method:	Thermal transfer
Dimensions (LxWxH):	650 x 270 x 400 mm
Electrical:	230 VAC
Air:	6 bar
